OBJECTIVE

I am looking for an opportunity to utilize my technical skills for achieving the target and developing the best performance in the organization.I would ike to implement my innovative ideas,skills and activity for accomplishing the projects

CERTIFICATES

- AWS Academy Cloud Foundations.
- AWS Academy Engineering Operations Technician.
- AWS Academy Data Center Technician.

PROJECTS

Project Title: E-commerce Website Development.

This comprehensive project involved creating a dynamic platform that showcased a variety of products and facilitated seamless transactions for users.

- **Frontend Development:** Utilizing HTML, CSS, and JavaScript, I designed the user interface with a focus on intuitive navigation and visually appealing layouts. I incorporated responsive design principles to ensure optimal viewing across various devices.
- **Backend Development:** I implemented dynamic content generation and database connectivity. This allowed for real-time updates of product listings, user authentication, and order processing.

Project Title: Door-to-Door Services Website Development

This an online platform called "Door-to-Door Services," aimed at providing a seamless experience for users seeking various home maintenance services. This project involved the integration of front-end and back-end technologies to create an intuitive and visually appealing website.

- **Frontend Development:** Using HTML, CSS, and JavaScript, I designed the user interface with a focus on usability and aesthetic appeal. Employing techniques like background image blur and text overlays, I ensured an immersive and engaging user experience.
- **Backend Development:** I implemented backend functionalities such as user authentication and service request processing. This facilitated seamless communication between the frontend and backend systems, enabling efficient data handling and management.

Project Title: CareerCrafters Website Development

This is an innovative online platform designed to provide comprehensive career services to users, catering to both IT and non-IT sectors. This project involved the integration of front-end and back-end technologies to deliver a seamless user experience and robust functionality.

- **Frontend Development:** Leveraging Thymeleaf templates, HTML, and CSS, I designed the user interface with a focus on usability and visual appeal. I implemented features such as dynamic image overlays and hover effects to enhance user engagement and navigation ease.
- **Backend Architecture:** Designed and implemented the backend architecture, including entities, controllers, services, service implementations, and repositories. This involved defining database schemas, creating RESTful APIs, and integrating with the frontend for seamless data exchange.

Project Title: UrPulse Website Development

this is the online platform designed to provide the doctor services to the people.This project involoves the front-end and the back-end technologies to provide the service to the patients in the online.the front-end is done using the ReactJs and backend is done using the(SpringBoot).This is an on going project now..
